

Chemours Joins Hydrogen Europe as Part of Its Commitment to Enabling the Transition to a Global Hydrogen Economy

August 11, 2021

GENEVA, Aug. 11, 2021 /PRNewswire/ -- The Chemours Company ("Chemours") (NYSE: CC), a global chemistry company with leading market positions in Titanium Technologies, Thermal & Specialized Solutions, Advanced Performance Materials, and Chemical Solutions, today announced it has joined **Hydrogen Europe**, the leading European association working to advance fuel cell and hydrogen (FCH) technologies. Chemours joins Hydrogen Europe's membership at a crucial time when investment in green hydrogen production via water electrolysis aligns with calls from global governments to accelerate the path to net-zero emissions.

Guided by its own ambitious goal to achieve net-zero greenhouse gas emissions by 2050, Chemours offers a variety of products that support the fight against climate change and expanded use of green hydrogen, including its **Nafion™** proton exchange membranes (PEM) which are at the center of the hydrogen economy. Known for unparalleled performance and durability, Nafion™ membranes and dispersions enable the scalable production of hydrogen through water electrolysis and the use of hydrogen as a fuel source in heavy-duty transport, passenger vehicles, and material handling.

"Chemours' chemistry is critical to powering progress as the world looks to decarbonize and we believe that green hydrogen will play an important role in a cleaner, greener energy future," said Randal King, Ph.D. and Vice President of Technology, Advanced Performance Materials at Chemours. "Hydrogen Europe opens doors for us to collaborate and contribute to solutions that positively impact the global community. We look forward to bringing Nafion™ PEMs to a broader base of applications and mobilizing more people, communities, and industries in the movement to establish hydrogen as a preferred solution in clean energy."

Chemours' approach to safe, responsible manufacturing and commitment to creating value for customers and stakeholders through the reliable delivery of high-quality products and services has received positive responses from European customers. Now as a member of Hydrogen Europe, Chemours joins more than 200 companies working to advance the goals of the hydrogen and fuel cells industry in Europe and influence global efforts to enable a zero-emission society.

About The Chemours Company

The Chemours Company (Chemours or the Company) (NYSE: CC) is a global leader in Titanium Technologies, Thermal & Specialized Solutions, Advanced Performance Materials, and Chemical Solutions providing its customers with solutions in a wide range of industries with market-defining products, application expertise and chemistry-based innovations. We deliver customized solutions with a wide range of industrial and specialty chemicals products for markets, including coatings, plastics, refrigeration, and air conditioning, transportation, semiconductor and consumer electronics, general industrial, mining and oil and gas. Our flagship products include prominent brands such as Ti-Pure™, Opteon™, Freon™, Nafion™, Kryto Teflon™, and Viton™. In 2019, Chemours was named to Newsweek's list of America's Most Responsible Companies. The company has approximately 6,500 employees and 30 manufacturing sites serving

approximately 3,300 customers in approximately 120 countries. Chemours is headquartered in Wilmington, Delaware and is listed on the NYSE under the symbol CC.

Forward-Looking Statements

This press release contains forward-looking statements, within the meaning of the safe harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995, which involve risks and uncertainties. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to a historical or current fact. The words "believe," "expect," "will," "anticipate," "plan," "estimate," "target," "project" and similar expressions, among others, generally identify "forward-looking statements," which speak only as of the date such statements were made. These forward-looking statements may address, among other things, the outcome or resolution of any pending or future environmental liabilities, the commencement, outcome or resolution of any regulatory inquiry, investigation or proceeding, the initiation, outcome or settlement of any litigation, changes in environmental regulations in the U.S. or other jurisdictions that affect demand for or adoption of our products, anticipated future operating and financial performance for our segments individually and our company as a whole, business plans, prospects, targets, goals and commitments, capital investments and projects and target capital expenditures, plans for dividends or share repurchases, sufficiency or longevity of intellectual property protection, cost reductions or savings targets, plans to increase profitability and growth, our ability to make acquisitions, integrate acquired businesses or assets into our operations, and achieve anticipated synergies or cost savings, all of which are subject to substantial risks and uncertainties that could cause actual results to differ materially from those expressed or implied by such statements. Forward-looking statements are based on certain assumptions and expectations of future events that may not be accurate or realized. These statements are not guarantees of future performance. Forward-looking statements also involve risks and uncertainties that are beyond Chemours' control. In addition, the current COVID-19 pandemic has significantly impacted the national and global economy and commodity and financial markets, which has had and we expect will continue to have a negative impact on our financial results. The full extent and impact of the pandemic is unknown and to date has included extreme volatility in the financial and commodity markets, a significant slowdown in economic activity, and increased predictions of a global recession. The public and private sector response has led to significant restrictions on travel, temporary business closures, quarantines, stock market volatility, and a general reduction in consumer and commercial activity globally. Matters outside our control have affected our business and operations and may continue to limit travel of employees to our business units domestically and internationally, adversely affect the health and welfare of our personnel, significantly reduce the demand for our products, hinder our ability to provide goods and services to customers, cause disruptions in our supply chains, adversely affect our business partners or cause other unpredictable events. Additionally, there may be other risks and uncertainties that Chemours is unable to identify at this time or that Chemours does not currently expect to have a material impact on its business. Factors that could cause or contribute to these differences include, but are not limited to: the terms and timing of the offering, the Tender Offer and any redemptions of the existing 2025 notes; and the risks, uncertainties and other factors discussed in our filings with the U.S. Securities and Exchange Commission, including in our Quarterly Reports on Form 10-Q for the quarters ended March 31, 2021 and June 30, 2021 and our Annual Report on Form 10-K for the year ended December 31, 2020. Chemours assumes no obligation to revise or update any forward-looking statement for any reason, except as required by law.
